CODE	DESCRIPTION	UNITS/CASE
------	-------------	------------

Made in Salerno since 1868, Amato's very high quality stems from two simple ideas: they start off with only the finest wheat and they monitor the production cycle constantly, along the whole chain from grain selection and cleaning to the final drying process.

Amato make use of knowledge acquired in earlier times to select and mix the best durum wheat. They then bring out all its characteristics as it is taken through the continuous processes of milling and conversion into pasta or semolina. This safeguards the products' natural flavours.

GUADINELLO & LEGGERA

Nature began working for Le Fonti di Monticchio 130,000 years ago when the volcano "vultur" as it was called by the ancient Romans, ceased its activity.

Here, for thousands of years,rain water has seeped through the tufts producing two kinds of water The Gaudianello natural sparkling water and the Leggera .

Its purity and taste is second to none.
